Change the way you feel about yourself.

Every woman wants to be beautiful. Plastic surgery is more than just a medical treatment. We help our clients improve not only their physical beauty, but also restore their inner selves, boost their confidence and bring back their passion for life.

There are many ways of how to boost our confidence. We can exercise at fitness clubs, eat healthy diets and re-charge our batteries by Yoga or other well known methods. But we need persistence and time in order to reach the goal. It all helps but last only limited time and then... losing the power and strength to fight we are back where we started. Every sophisticated man or woman take the appearance of themselves earnestly by selecting the proper clothes or again a hairstyle and all what at the end makes them feel good and self-confident.

Another, but certainly more effective way is Plastic Surgery. Nowadays is much more affordable and a lot less risky than it was time ago. Qualified surgeons with long-term successful practice are offering you their hand. You can save money and have an affordable holiday with your partner or friend with no extra cost. Explore new destinations and meet new people. Make your dream come true and everything else will come along.

“ I feel very lucky to have had such a wonderful surgeon and her skill and friendship made my surgery successful. ”

It was a bit ambitious to have both surgeries done at the same time but I do not regret it for a moment. The services offered by yourselves were most comprehensive and I felt very comfortable at all times of the procedure. From the first meeting at the airport I was put at ease and the hospital care was superb.

I feel very lucky to have had such a wonderful surgeon and her skill and friendship made my surgery successful. The beauty breaks were very welcome to make me feel

much more my self after the operation. I will always remember our trip to the mountains with you and really made a holiday out of a medical break. I would recommend your service to all who are sure about the procedure that they want. I would be happy to discuss my surgery with potential users of your service.

Overall the experience was remarkably good and I am sure that I made the correct choice in coming to you for surgery.

Rosemary from UK, age 59, Tummy Tuck and Breast Lift

“ The care and attention i received after surgery by the care team was fantastic. ”

The care and attention i received after surgery by the care team was fantastic. I received phone calls and was asked if i needed food ordering or any other help with anything. I was kept informed of check-up times with the surgeon and how to take care of my wounds properly. Everything i needed for my wounds was provided also. Including tea for healing which was delicious.

The beauty breaks were such a bonus! I had a gorgeous manicure and pedicure and i found both treatments

were a welcome pampering addition to my stay. My chosen trip to the mountains was delightful. Ivan

My stay in Slovakia was truly wonderful. I felt like i had a holiday, a rest and some fun as well as having the surgery. It is a lovely little city and a perfect destination to go to for surgery. There is just enough to see and do to keep clients occupied. After surgery it would be difficult to be somewhere bigger and busier. I would recommend Kosice to anyone without hesitation.
